

OutSite

Your ICT partner in agribusiness

Controlled registration on location

Out :: Site

1. Identify

What is...

OutSite enables you to collect data when you are away from the office. You can use the OutSite software on your handheld computer or even on your smartphone. →

2. Collect data

Use different devices to automate data entry.

How

- Seamless integration with your backoffice
- Connect i.e. scanners, scales, GPS
- Make and directly link photo's to objects
- Barcodes or RFID for identification
- Off line registration
- Flexible form design

3. Send data

Send data back to your back office using the internet.

Benefits

- Save time
- Improve data integrity
- Standardize doing observations
- Save time by connecting input devices
